Merry Manzanita

Merry Manzanita has been getting the perfect amount of water recently.

Merry Manzanita is currently getting plenty of sun.

The soil around **Merry Manzanita** is currently lacking some essential nutrients. A liquid fertilizer could improve the plant's health greatly.

Next two weeks

About

Manzanita is a common name for many species of the genus [Arctostaphylos](#). They are evergreen shrubs or small trees present in the chaparral biome of western North America. Manzanitas can live in places with **poor soil** and **little water**.

There are 105 species and [subspecies of manzanita](#), 95 of which are found in the [Mediterranean climate](#) and colder mountainous regions of California, ranging from ground-hugging coastal and mountain species to small trees up to 20 feet (6m) tall. They are characterized by smooth orange or red bark and stiff, twisting branches.

Calendar

22	23	24	25	26	27	
29	30	31	1	2	3	
5	6	7	8	9	10	

Pressing issues

Zack the Plant is not getting it's vital sunlight and will start wilting soon. The plant **needs** to be put by a sunny south facing window or outside.

The soil around **Merry Manzanita** is currently lacking some essential nutrients. A liquid fertalizer could improve the plants health greatly.

The soil around **Jerry the Plant** has been left a little dry latley. Make sure some water is dripping from the drainage holes every time you water.

Mini Mike has not been getting enough sun latley. It needs a lot so make sure it's near a large unobstructed window

The soil around **Mini Mike** has been left a little dry latley. Make sure some water is dripping from the drainage holes every time you water.

Struggling tomato plants died for the seccond year in a row

Hey guys, I've been trying to grow a patch of tomato plants for the past two years but they always end up witing round this time of year. I was able to get a small yeild from the plants, but I know they should be able to live a little later in the season and I'm not sure what I'm doing wrong.

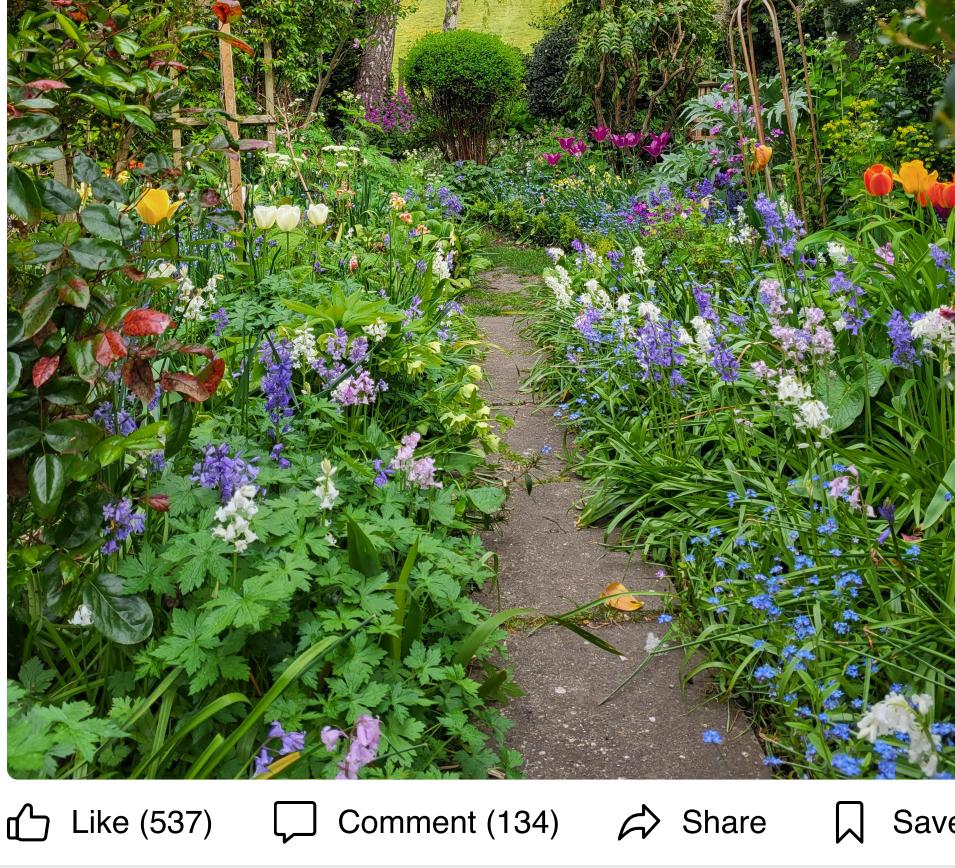

There are a few pics attached that show the surrent state of the plants. I usually water them twice a week and my soil is relitivley high in clay but I've been turning it from compost from the store to loosen it up.
